# Figures and Tables

FIGURE 3.1	The path of a news story within a small newsroom: Medialink primary industries news service, Wellington	35
FIGURE 3.2	News processing on a local paper: <i>The Dominion</i> , Wellington's morning daily	45
FIGURE 3.3	International news flow: how a story gets from Wellington to Buenos Aires	49
FIGURE 3.4	The embedding of each version of a story within the succeeding version as copy is edited at Medialink	51
FIGURE 3.5	The embedding of the news-gathering interview in the final news story	53
FIGURE 4.1	Embedding of inputs to construct the text of a news story	63
FIGURE 4.2	The embedding of spoken and written inputs into final news text: one paragraph from the story in figure 4.1	64
FIGURE 4.3	A page of wire copy with markings by recipient New Zealand editor	69
FIGURE 5.1	Persons and roles in the speech situation	91
FIGURE 5.2	From addressees to eavesdroppers: audience segments for a rock music station, ZM Auckland	94
FIGURE 5.3	Audience layering in mass communication	96
FIGURE 5.4	Breaking down the barriers: participation format of radio phone-in programme	102
FIGURE 6.1	Percentage of determiner deletion in seven British daily newspapers	108
FIGURE 6.2	Occupation profiles of audiences for Auckland radio stations	116
FIGURE 6.3	Percentage of consonant cluster reduction on six Auckland radio news stations in four linguistic environments	118

FIGURE 6.4	Percentage of consonant cluster reduction for three YA/ZB newscasters, and two YAR/ZBR newscasters in four linguistic environments	120
FIGURE 6.5	Determiner reinsertion in international news agency copy (AAP) by New Zealand copy editors in three news media	124
FIGURE 7.1	Categories and characteristics of referee design	128
FIGURE 7.2	Percentage of determiner deletion in four British and four American prestige media, 1980-1982	131
FIGURE 7.3	Percentage of determiner deletion on four New Zealand radio stations, 1974 and 1984	132
FIGURE 7.4	Percentage of determiner deletion in the British newspaper, the <i>Daily Mirror</i> , 1920-1990, plus percentage deletion of articles only	133
FIGURE 7.5	Dialects used in New Zealand television commercials, as percentage of total number of advertisements in which different dialects occurred	138
FIGURE 8.1	Narrative structure and time structure of international spot news story ( <i>The Dominion</i> , Wellington, 2 April 1990)	150
FIGURE 8.2	Components of an international news agency story, <i>Dominion Sunday Times</i> , Wellington, 1 April 1990	166
FIGURE 8.3	Structure of Lithuania story from figure 8.2	167
FIGURE 8.4	Outline model structure of news texts	171
FIGURE 8.5	The way it was: story from <i>Washington Chronicle</i> , 10 December 1876	173
FIGURE 9.1	Headlines and lead paragraphs from ten international news agency stories, April 1990	178
FIGURE 9.2	Structure of lead and headline in an international story	182
FIGURE 9.3	Amount of New Zealand climate change coverage quoting different source types	192
FIGURE 10.1	Overstatement through displacing timeframe: opening paragraphs of lead story in Wellington's <i>The Dominion</i> newspaper, 20 December 1988	223
FIGURE 11.1	Distribution of New Zealand consumption of ozone depleting substances, and distribution of mentions of the substances in news reporting, compared to the public's mentions	241
FIGURE 11.2	Estimates of possible sealevel rises by 14 members of the New Zealand public, plotted against the upper and lower scenarios from the 1985 Villach conference and from the 1988 Royal Society of New Zealand report	244

FIGURES AND TABLES		ix
TABLE 3.1	Roles in producing language	36
TABLE 3.2	Roles in producing news language	39
TABLE 6.1	Characteristics of five radio stations in Auckland, 1974	112
TABLE 6.2	Determiner deletion in two news agencies and two radio stations in New Zealand	123
TABLE 10.1	Numbers of inaccuracies of different classes in New Zealand news about climate change, and percentage of stories in which different classes of inaccuracy occurred	218
