

Table of Contents

1. Insects: Politics, Ecology and Basic Sciences.....	5
2. Principles of Peptide Structure.....	11
3. The Principles of Quantum Mechanics	21
4. Ab Initio Study of the Lom-AKH-I peptide in gas-phase environment.....	25
5. Nuclear Magnetic Resonance Principles.....	33
6. Conformational Study on an Insect neuropeptide of the AKH/RPCH-family by combined ^1H NMR spectroscopy and Molecular Mechanics	47
7. Structural Study on a Lom-AKH-I peptide in DMSO- d_6 solution using ^1H NMR technique	55
8. Conformational study on a representative member of the AKH/RPCH neuropeptide family, Emp-AKH, in the presence of SDS micelles.....	69
9. Molecular Modeling Principles.....	75
10. Conformational Studies of the Emp-AKH peptide using Molecular and Langevin Dynamics Methods	83
11. Molecular Dynamics study of Lom-AKH-I peptide (RPCH hormone) in different environments mimicked by dielectric constant.....	89
12. Molecular Dynamics study on an Adipokinetic Hormone Peptide in Aqueous Solution.....	101
13. Molecular dynamics simulations of a fully hydrated dimyristoylphosphatidylcholine membrane in liquid-crystalline phase	105
14. Summary and Conclusions.....	111
15. List of publications included in the thesis.....	115
