Preface to the second edition xiii
A note for course organisers and class teachers xiv

Introduction 1
Linguistics 2
Developmental linguistics 6
Psycholinguistics 9
Neurolinguistics 11
Sociolinguistics 14
Exercises 17

Further reading and references 21

Part I Sounds 23

1 Introduction 25

2 Sounds and suprasegmentals 27
Consonants 28
Vowels 36
Suprasegmentals 41
Exercises 44

3 Sound variation 47
Linguistic variables and sociological variables 47
Stylistic variation 53
Linguistically determined variation 54
Variation and language change 56
Exercises 59

4 Sound change 61
Consonant change 61
Vowel change 64
The transition problem: regular sound change versus lexical diffusion 67
Suprasegmental change 70
Exercises 72

5 Phonemes, syllables and phonological processes 75
Phonemes 75
Syllables 78
Syllabification and the Maximal Onset Principle 81
Phonological processes 82
Phonological features 85
Features and processes 86
Constraints in phonology 90
Exercises 92

6 Child phonology 96
Early achievements 96
Phonological processes in acquisition 97
Perception, production and a dual-lexicon model 100
Exercises 106

7 Processing sounds 109
Speech perception 109
Speech production 113
Other aspects of phonological processing 117
Exercises 120

Further reading and references 122

Part II Words 125

8 Introduction 127

9 Word classes 129
Lexical categories 129
Functional categories 132
The morphological properties of English verbs 135
Exercises 138

10 Building words 140
Morphemes 140
Morphological processes – derivation and inflection 143
Compounds 148
Clitics 150
Allomorphy 151
Exercises 153

11 Morphology across languages 156
The agglutinative ideal 156
Types of morphological operations 162
Exercises 165

12 Word meaning 170
Entailment and hyponymy 170
Meaning opposites 175
Semantic features 176
Dictionaries and prototypes 180
Exercises 182

13 Children and words 186
Early words – a few facts 186
Apprentices in morphology 188
The semantic significance of early words 192
Exercises 196

14 Lexical processing and the mental lexicon 199
Serial-autonomous versus parallel-interactive processing models 199
On the representation of words in the mental lexicon 204
Exercises 211

15 Lexical disorders 213
Words and morphemes in aphasia 214
Agrammatism 215
Paraphasias 217
Dissociations in SLI subjects' inflectional systems 219
Exercises 221

16 Lexical variation and change 224
Borrowing words 224
Register: words for brain surgeons and soccer players, hairdressers and lifesavers 226
Biscuit or cookie? Variation and change in word choice 226
Same word – new meaning 228
Variation and change in morphology 233
Exercises 238

Further reading and references 242

Part III Sentences 244
17 Introduction 245

18 Basic terminology 247
Categories and functions 247
Complex sentences 250
The functions of clauses 253
Exercises 254

19 Sentence structure 257
Merger 257
Tests for constituency 263
Agreement, case assignment and selection 264
Exercises 268

20 Empty categories 271
Empty T constituent 271
PRO: the empty subject of infinitive clauses 276
Covert complements 278
Empty complementisers 278
Empty determiners 283
Exercises 287

21 Movement 293
Head movement 293
Operator movement 297
Yes–no questions 302
Other types of movement 304
Exercises 307

22 Syntactic variation 311
Inversion in varieties of English 311
Syntactic parameters of variation 314
The Null Subject Parameter 319
Parametric differences between English and German 321
Exercises 325

23 Sentence meanings and Logical Form 330
Preliminaries 330
Thematic roles 333
A philosophical diversion 336
Covert movement and Logical Form 339
Exercises 345

24 Children's sentences 349
Setting parameters: an example 350
Null subjects in early Child English 351
Non-finite clauses in Child English 354
Children's nominals 358
Exercises 361

25 Sentence processing 366
Click studies 367
Processing empty categories 368
Strategies of sentence processing 370
Exercises 375

26 Syntactic disorders 377
Agrammatism 378
Paragrammatism 382
Specific Language Impairment (SLI) 383
Exercises 386

27 Using sentences 388
Context and pronouns 388
Topic/focus 389
Presuppositions 392
Doing things with words 394
The logic of conversation 395
Context and coherence 397
Relevance Theory 398
Taking turns 400
Exercises 402

Further reading and references 405

Conclusion 407

Appendix 1 The International Phonetic Alphabet 411
Appendix 2 Phonological distinctive features 412
Appendix 3 Distinctive feature matrix for English consonant phonemes 414
Bibliography 415
Index 422

Figures

1	The human cerebral cortex, with the functions of some areas indicated	*page* 12
2	The human cerebral cortex, with Broca's Area (BA) and Wernicke's Area (WA) indicated	12
3a	Centralisation and age on Martha's Vineyard	19
3b	Location and centralisation on Martha's Vineyard	19
3c	Leavers and stayers on Martha's Vineyard	20
4	Cross-section of the human vocal tract	28
5	Cross-section of the vocal tract, illustrating the articulation of [m]	30
6	Cross-section of the vocal tract, illustrating the articulation of [n]	30
7	Cross-section of the vocal tract, illustrating the articulation of [ŋ]	31
8	Cross-section of the vocal tract, illustrating the articulation of interdental sounds	32
9	Cross-section of the vocal tract, illustrating the articulation of labiodental sounds	32
10	Cross-section of the vocal tract, illustrating the articulation of [j]	32
11	Cross-section of the vocal tract, illustrating the articulation of palato-alveolar sounds	33
12	The vowel quadrilateral (including only short vowels)	37
13	The vowel quadrilateral (with long vowels)	38
14	The vowel quadrilateral, including mid-closed vowels	38
15	The diphthongs of English	39
16	The vowel quadrilateral, including central vowels	40
17	Sound variation and speaker educational achievement: vowel assimilation in Tehran Farsi	49
18	The use of standard pronunciations of (ing) and speaker sex and social class	50
19	Ethnic variation in New Zealand English	50
20	Degree of backing of /ʌ/ among students at a Detroit high school	53
21	A travel agent's style shifting to clients: (t)-flapping	54
22a	Percentage of department store assistants using [r] by store	58
22b	Percentage of Saks department store assistants using [r] by age	58

22c Casual and emphatic pronunciations of [r] in New York department stores 59
23 Stylistic shifts in the speech of a lecturer 60
24 The pronunciation of (o) in Ucieda Spanish by speaker occupation 60
25 A vowel split in London 65
26 The Northern Cities Chain Shift 67
27 The devoicing of /v/ to [f] in Netherlands and Belgian Dutch between 1935 and 1993 73
28 An Optimality Theory tableau for the input /pin/ in English 91
29 Preliminary model of child phonology 98
30 Lateral harmony as feature spreading 102
31 Lateral harmony: constructing the output UR 103
32 A dual-lexicon model of child phonology 104
33 Matching input representation to syllable structure template 105
34 Results of an identification experiment for an [ɪ – ɛ]-series 111
35 Results of a discrimination experiment for an [ɪ – ɛ]-series 111
36 Results of an identification experiment for a [b – p]-series 112
37 Results of a discrimination experiment for a [b – p]-series 113
38 A simplified version of the scan-copier model of speech production 116
39 One view of the structure of the mental lexicon, illustrating the form of a lexical entry 205
40 A simple concept 206
41 Five conditions in a word/non-word recognition experiment 207
42 Differences between types of speech errors 208
43 Reported use of lexical pairs in New Zealand English 227
44 The adoption of British English by Canadian children 228
45 The lexical attrition of *dwile* in East Anglia 229
46 Speaker sex and the use of (ing) in casual speech in three English-speaking cities 234
47a Social class and the use of (ing) in casual speech in Norwich 235
47b Speech style and the use of (ing) among upper working-class residents of Norwich 235
48 Changes in the use of (ing) in Norwich across the generations 236
49 Ethnicity, levels of interethnic contact and the use of AAVE morphological features 237
50 Third person singular present tense zero in three locations in East Anglia 240

Map

The lexical attrition of the word *dwile* in East Anglia 229

Tables

1	IPA transcription for the English consonants	*page* 29
2	Consonantal sounds arranged by place and manner of articulation	35
