List of illustrations	xiii
Preface	xvii
Extracts from the preface to the first edition	xix
<b>1 INVESTMENT DECISIONS AND CORPORATE OBJECTIVES</b>	<b>1</b>
Investment decisions	2
The limitations of quantification	3
The state of business practice	4
Time, risk, and the risk–return trade-off	4
Three basic generalizations	4
Relevance of cash flows	5
Cash flows versus earnings	6
The capital market	6
The weighted average cost of capital	7
Tactical and strategic decisions	7
The role of strategic planning	8
The two capital budgeting revolutions	8
Conclusions	9
Pop quiz	10
Problems	10
Answer to pop quiz	11
Bibliography	11
<b>2 THE TIME VALUE OF MONEY</b>	<b>12</b>
Time discounting	12
Future value	13
Present value	15
Computing present value factors	16
Annual equivalent amounts	23
A growing annuity	24
A constant interest bond	25
Present value factors derived from market prices	26
Conclusions	31

Pop quiz	32
Review problem	32
Problems	32
Answer to pop quiz	35
Solution to review problem	36
Bibliography	36
Appendix A	36
Appendix B	37
<b>3 CAPITAL BUDGETING: THE TRADITIONAL SOLUTIONS</b>	<b>43</b>
A capital budgeting decision	43
Rate of discount	43
Classification of cash flows	44
Classifying investments	44
Measures of investment worth	46
Two discounted cash flow methods	48
Net present value profile	53
Payback period	54
Return on investment	55
What firms do	60
Cash flows	61
Working capital	63
Excluding interest payment	64
Conclusions	73
Pop quiz	74
Review problems	75
Problems	75
Answers to pop quiz	83
Solutions to review problems	83
Bibliography	84
<b>4 MUTUALLY EXCLUSIVE INVESTMENTS</b>	<b>85</b>
Accept or reject decisions	86
Mutually exclusive investment	87
Incremental benefits: the scale problem	87
Timing	88
Reinvestment assumption	91
Reinvestment rate of return	91
Loan-type flows	92
Multiple internal rates of return	93
Interpretation of multiple IRRs	94
A "paradox"	95
Converting multiple IRRs to a single IRR	97
Significance of nonconventional cash flows	99
Ranking independent investments	100
Mutually exclusive alternatives with different risks	101
Duration: a sensitivity measure	102
Why the internal rate of return method is popular	103
Choosing the required rate of return	103
Conclusions	104

Review problem	105
Problems	106
Solution to review problem	111
Bibliography	112
<b>5 ANNUAL EQUIVALENT COSTS AND REPLACEMENT DECISIONS</b>	<b>113</b>
Annual equivalent cost	113
Make or buy decisions	114
Comparability	116
Mutually exclusive alternatives with different lives	116
Annual equivalent cost	118
Lowest common multiple life	119
A perpetuity	119
Components of unequal lives	120
Cost of excess capacity	121
The equal cost assumption	122
The replacement decision	122
Replacement chains	125
Conclusions	125
Review problem	126
Problems	127
Solution to review problem	133
Bibliography	134
<b>6 CAPITAL BUDGETING UNDER CAPITAL RATIONING</b>	<b>135</b>
External capital rationing	136
Internal capital rationing	141
Internal capital rationing and dividend policy	141
Ranking of investments	142
Index of present value (or profitability index)	144
Programming solutions	145
Capital rationing and risk	148
Conclusions	148
Problems	148
Bibliography	150
<b>7 THE USE OF THE WEIGHTED AVERAGE COST OF CAPITAL AND OTHER RATES OF DISCOUNT</b>	<b>152</b>
The sources of cash	153
The cost of retained earnings	153
A theory of stock values	154
Changes in stock prices	157
Accumulated depreciation and the cost of capital	158
Issuing common stock	160
Cost of retained earnings: with investor taxes	160
Cost of new equity capital	161
Issuing common stock: the element of timing	161
Delaying the investment	163
Cost of long-term debt	164
Cost of short-term debt	165

Debt and income taxes	166
Weighted average cost of capital	167
The optimum capital structure	168
Summary of weighted average cost of capital	169
Default-free rate of discount	170
Adjusting the default-free rate	171
Comparing average and marginal returns	172
Conclusions	172
Problems	172
Bibliography	178
<b>8 THE CAPITAL ASSET PRICING MODEL</b>	<b>180</b>
The assumptions	181
Introduction to portfolio analysis	182
Forming portfolios	183
The investors	186
Portfolio analysis with a riskless security	187
The efficient frontier	187
The capital market line	190
The expected rate of return of a security	192
The security characteristic line	192
Systematic and unsystematic risks	194
The security market line	195
Required rate of return versus WACC	197
Making investment decisions	198
Conclusions	199
Review problem	200
Problems	201
Solution to review problem	204
Bibliography	204
<b>9 THE COST OF CAPITAL AND CAPITAL STRUCTURE</b>	<b>206</b>
The weighted average cost of capital	206
Definition	207
The weights	209
Capital budgeting decisions	210
Investments and taxes	210
Existence of a unique optimal financial structure	211
No taxes	213
A constant WACC (no taxes)	216
A constant value	217
Levering a firm	217
Taxes	218
Implications of the zero corporate tax model	219
The value of a levered firm with taxes	219
Valuing a firm: capital structure and corporate taxes	220
Personal taxes	221
Conclusions	222
Problems	224
Bibliography	229

<b>10 DISTRIBUTION POLICY AND CAPITAL BUDGETING</b>	<b>231</b>
A cash dividend: from retained earnings	231
Investment: new capital	232
Share repurchase versus real investment	233
A different required return	234
Model	234
Maintenance cap-ex	236
The capital structure	236
Risk assumptions	236
The derivation of $1/(M-1)$	237
Conclusions	240
Problems	240
Bibliography	241
<b>11 A FIRM INVESTING IN A SECOND FIRM</b>	<b>242</b>
Tax implications	243
Anti-raiding maneuver	244
Antitrust considerations	244
An acquisition for cash	244
Determining the premium	245
Analysis with capital gains	247
A holding company	249
Valuation for acquisition	249
The <i>P/E</i> ratio	251
Dilution of earnings: the period of dilution	254
Elimination of dilution	254
Forecasting the post-acquisition price	256
Dividend versus an acquisition of shares	257
Conclusions	259
Problems	259
Bibliography	261
<b>12 INVESTING IN CURRENT ASSETS</b>	<b>262</b>
Decisions affecting cash	263
Timing strategies	264
Acquiring the cash from long-term sources	266
A reformulation	268
Timing considerations	271
Near-cash securities	271
Managing accounts receivable	273
Calculation of costs	275
One-period case with time discounting	275
Multiperiod case	277
Systematic revision of probabilities	278
Problems in application	280
Inventory and finance	281
Inventory models versus "just in time"	282
Inventory models	282
Conclusions	285
Problems	287
Bibliography	289

<b>13 FOREIGN INVESTMENTS</b>	<b>290</b>
Currency translation	290
A different approach	291
The irrelevance of future plans	292
The leverage consideration	293
Taxes	295
One-period example	295
Multiperiod case	296
Remission of funds	297
Foreign investment and risk	297
Conclusions	298
Problems	298
Bibliography	301
<b>14 THE BUY VERSUS LEASE DECISION</b>	<b>303</b>
Three basic problems of analysis	303
One incorrect method	304
The two correct methods	306
Residual value	306
The investment decision	307
The lease decision with taxes	309
Risk-adjusted discount rates	311
The calculation that is not made	311
Cash flows and discount rate: debt	312
Pros and cons of leasing	313
Three decisions	315
Conclusions	316
Problems	316
Bibliography	318
<b>15 AN INTRODUCTION TO REAL OPTIONS</b>	<b>319</b>
Black-Scholes	320
Option valuation when there is no hedge portfolio	321
The value of waiting	323
An option to expand	324
Put options on real assets: an opportunity to sell	326
Embedded options: the value of future uses	327
Valuation: expected value less than liabilities	327
Advantages of the option approach	328
Disadvantages of the option approach	329
Conclusions	330
Problems	331
Discussion question	332
Bibliography	332
<b>16 CAPITAL BUDGETING AND INFLATION</b>	<b>334</b>
What is inflation?	334
Real cash flows	335
Real cash flows and nominal flows	335

The use of specific prices	336
Real and nominal discount rates	338
Inflation analysis: a simplified approach	340
Tax effects	342
A tax-exempt alternative	343
The real return and the rate of inflation	343
Conclusions	346
Problems	346
Bibliography	348
<b>17 REFLECTIONS ON THE CAPITAL BUDGETING DECISION</b>	<b>350</b>
The criticisms of NPV	350
Cash on cash	351
Real options	352
Cash flow components	353
The compounding of risk	353
Investing in other countries	353
Conclusions	354
Problems	354
<b>18 CASES</b>	<b>356</b>
<b>APPENDICES</b>	<b>380</b>
Table A: Present value of \$1.00	380
Table B: Present value of \$1.00 received per period	384
Name index	389
Subject index	393
