Introduction	7
--------------------	---

Part I The Continuous-time Financial Framework

1	Consumption and Investment Optimization in a Complete Market ..	13
1.1	The Financial Market	13
1.2	Portfolio and Wealth Processes	15
1.3	Utility Function and the Optimization Problem	18
1.3.1	The Utility Function	18
1.3.2	The Optimization Problem	19
1.4	Utility from Consumption and Terminal Wealth	19
1.5	Utility from Consumption or Terminal Wealth	26
2	Utility Maximization Consumption and Investment under Constraints	33
2.1	The Original Market and the Constrained Optimization Problem	33
2.2	The Auxiliary Market and the Unconstrained Optimization Problem	35
2.3	Equivalent Optimality Conditions	43
2.4	The Duality Problem	46
3	Identifying the Dual Forms	49
3.1	Identifying the Dual Problems - the Schema	50
3.2	Optimal Consumption and Terminal Wealth	50
3.3	Optimal Consumption and Investment for a "Simple Large" Investor	53
3.4	The Problem of Super-replication under Constraints	55

Part II The Semimartingale Financial Framework

4	Optimal Investment in Incomplete Markets	61
4.1	The Formulation of the Primal and Dual problem	61
4.2	The Abstract Setting	63

4.3	The Main Results - An Abstract Version	66
4.3.1	The Dual Problem - Existence and Uniqueness	66
4.3.2	The Primal Problem - Existence and Uniqueness	70
4.4	Existence Result and Characterization of the Optimal Investment	78
5	Utility Maximization under Additive Constraints	85
5.1	The Stochastic Framework	86
5.2	The Financial Applications	89
5.2.1	Incomplete Market Model	90
5.2.2	Constrained portfolios	90
5.2.3	Simple Large Investor Model	92
5.2.4	Simple Large Investor Model with Labor Income	98
5.3	The Dual Set	98
5.4	Stochastic Optimization from Terminal Wealth	99
5.4.1	The Abstract Setting	100
5.4.2	The Primal Problem - Existence and Uniqueness	105
5.4.3	The Dual Singular Formulation	108
5.5	Utility Maximization from Terminal Wealth and Consumption	117
5.5.1	The Abstract Setting	118
5.5.2	The Primal Problem - Existence and Uniqueness	121
5.5.3	The Dual Singular Formulation	124
6	Stochastic Optimization under Multiplicative Constraints	135
6.1	The Model Setting	136
6.2	The Dual Set	139
6.3	The Stochastic Optimization from Terminal Wealth	141
6.3.1	The Abstract Setting	141
6.3.2	The Primal Problem - Existence and Uniqueness	146
6.3.3	The Dual Problem	147
6.4	The Utility Maximization from Terminal Wealth and Consumption	154
6.4.1	The Abstract Setting	155
6.4.2	Existence results and characterization of the optimal solution	158
7	Concluding Remark	173
A	The Upper Variation Process	175
B	Optional Decomposition under Constraints - in additive form	177
C	Optional Decomposition under Constraints - in multiplicative form	183
D	The Asymptotic Elasticity of a Utility Function	189
	References	195
