Introduction	v	6 Human health and physiology I	130
How to use this book	vi	Introduction	130
1 Statistical analysis	1	6.1 Digestion	130
Introduction	1	6.2 The transport system	134
1.1 Mean and distribution	1	6.3 Defence against infectious disease	140
1.2 The <i>t</i> -test	4	6.4 Gas exchange	146
1.3 Correlation and cause	8	6.5 Nerves, hormones and homeostasis	149
2 Cells	12	6.6 Reproduction	157
Introduction	12	7 Nucleic acids and proteins (HL)	170
2.1 Cell theory	12	Introduction	170
2.2 Prokaryotic cells	20	7.1 DNA structure	170
2.3 Eukaryotic cells	22	7.2 DNA replication	173
2.4 Membranes	28	7.3 Transcription	175
2.5 Cell division	34	7.4 Translation	177
3 The chemistry of life	40	7.5 Proteins	182
Introduction	40	7.6 Enzymes	185
3.1 Chemical elements and water	40	8 Cell respiration and photosynthesis (HL)	194
3.2 Carbohydrates, lipids and proteins	42	Introduction	194
3.3 DNA structure	46	8.1 Cell respiration	194
3.4 DNA replication	48	8.2 Photosynthesis	201
3.5 Transcription and translation	49	9 Plant science (HL)	214
3.6 Enzymes	53	Introduction	214
3.7 Cell respiration	58	9.1 Plant structure and growth	214
3.8 Photosynthesis	60	9.2 Transport in angiospermophytes	220
4 Genetics I	67	9.3 Reproduction in angiospermophytes	228
Introduction	67	10 Genetics II (HL)	236
4.1 Chromosomes, genes, alleles and mutation	67	Introduction	236
4.2 Meiosis	71	10.1 Meiosis	236
4.3 Theoretical genetics	77	10.2 Dihybrid crosses and gene linkage	240
4.4 Genetic engineering and biotechnology	87	10.3 Polygenic inheritance	248
5 Ecology and evolution	100	11 Human health and physiology II (HL)	253
Introduction	100	Introduction	253
5.1 Communities and ecosystems	100	11.1 Defence against infectious disease	253
5.2 The greenhouse effect	105	11.2 Muscles and movement	260
5.3 Populations	111	11.3 The kidney	267
5.4 Evolution	113	11.4 Reproduction	274
5.5 Classification	119		

Option A Human nutrition and health

	288
Introduction	288
A1 Components of the human diet	288
A2 Energy in human diets	297
A3 Special issues in human nutrition	301

Option B Physiology of exercise 310

Introduction	310
B1 Muscles and movement	310
B2 Training and the pulmonary system	317
B3 Training and the cardiovascular system	319
B4 Exercise and respiration	322
B5 Fitness and training	325
B6 Injuries	328

Option C Cells and energy 333

Introduction	333
C1 Proteins	333
C2 Enzymes	337
C3 Cell respiration	341
C4 Photosynthesis	348

Option D Evolution 360

Introduction	360
D1 Origin of life on Earth	360
D2 Species and speciation	366
D3 Human evolution	377
D4 The Hardy-Weinberg principle (HL)	383
D5 Phylogeny and systematics (HL)	388

Option E Neurobiology and behaviour 402

Introduction	402
E1 Stimulus and response	402
E2 Perception of stimuli	405
E3 Innate and learned behaviour	412
E4 Neurotransmitters and synapses	418
E5 The human brain (HL)	422
E6 Further studies of behaviour (HL)	428

Option F Microbes and biotechnology 437

Introduction	437
F1 Diversity of microbes	437
F2 Microbes and the environment	442
F3 Microbes and biotechnology	448
F4 Microbes and food production	452
F5 Metabolism of microbes (HL)	455
F6 Microbes and disease (HL)	457

Option G Ecology and conservation 471

Introduction	471
G1 Community ecology	471
G2 Ecosystems and biomes	481
G3 Impacts of humans on ecosystems	490
G4 Conservation of biodiversity (HL)	497
G5 Population ecology (HL)	505

Option H Further human physiology (HL) 515

Introduction	515
H1 Hormonal control	515
H2 Digestion	519
H3 Absorption of digested foods	524
H4 Functions of the liver	526
H5 The transport system	531
H6 Gas exchange	537

Answers to short-answer questions 548

Answers to end-of-chapter questions 559

Glossary 581

Index 595
