Introduction

vii

PART 1 KNOWERS AND KNOWING

1 The problem of knowledge	3
Introduction	4
Common sense	4
Certainty	8
Relativism	10
What should we believe?	11
Who cares?	15
Conclusion	16
<i>Reading resources</i>	19

2 The nature of knowledge	23
Introduction	24
Knowledge as justified true belief	24
Levels of knowledge	28
Second-hand knowledge	30
Conclusion	37
<i>Reading resources</i>	40

PART 2 WAYS OF KNOWING

3 Language	47
Introduction	48
What is language?	48
The problem of meaning	51
Language and translation	61
Labels and stereotypes	64
Language and thought	68
Language and values	71
Conclusion	76
<i>Reading resources</i>	79

4 Perception	85
Introduction	86
Perceptual illusions	87
Selectivity of perception	91
Seeing and believing	93
Distinguishing appearance from reality	95
Ultimate reality	96
Conclusion	101
<i>Reading resources</i>	105

5 Reason	111
Introduction	112
Deductive reasoning	114
Inductive reasoning	119
Informal reasoning	124
Reason and certainty	131
Lateral thinking	135
Conclusion	137
<i>Reading resources</i>	141

6 Emotion	145
Introduction	146
The nature of the emotions	146
Emotions as an obstacle to knowledge	151
Emotions as a source of knowledge	155
Intuition	158
Conclusion	165
<i>Reading resources</i>	169

Appendices to Part 2

Appendix A: Propositions	174
Appendix B: Paradigms	180

PART 3 AREAS OF KNOWLEDGE

7 Mathematics	187
Introduction	188
The mathematical paradigm	189
Proofs and conjectures	192
Beauty, elegance and intuition	195
Mathematics and certainty	197
Discovered or invented?	202
Non-Euclidean geometry and the problem of consistency	205
Applied mathematics	208
Conclusion	210
<i>Reading resources</i>	213

8 The natural sciences	220	Science, art and truth	349
Introduction	221	Conclusion	353
Science and pseudo-science	222	<i>Reading resources</i>	356
The scientific method	225		
Problems with observation	228	12 Ethics	363
Testing hypotheses	230	Introduction	364
The problem of induction	233	Moral reasoning	364
Falsification	235	Moral relativism	367
Science and society	240	Self-interest theory	372
Science and truth	245	Theories of ethics	376
Conclusion	246	Duty ethics	377
<i>Reading resources</i>	250	Utilitarianism	385
		Conclusion	392
		<i>Reading resources</i>	396
9 The human sciences	256		
Introduction	257	13 Religion (optional)	403
Observation	258	Introduction	404
Measurement	264	The nature of God	405
Experiments	268	The argument from	
Laws	270	religious experience	409
The relationship between natural		The argument from design	412
and human sciences	273	The cosmological argument	414
Conclusion	280	The problem of suffering	417
<i>Reading resources</i>	283	Reason versus faith	420
		The varieties of religion	424
		Conclusion	428
		<i>Reading resources</i>	431
Appendix to Chapter 9			
The free-will problem	288		
10 History	300	PART 4 CONCLUSION	
Introduction	301	14 Truth and wisdom	439
What is history?	302	Introduction	440
Why study history?	304	Correspondence theory	440
How can the past be known?	307	Coherence theory	442
Writing history	311	Pragmatic theory	443
The problem of bias	313	Summary of theories	447
Theories of history	315	Can we know the truth?	447
Conclusion	319	Beyond dogmatism and	
<i>Reading resources</i>	322	relativism	449
		What price truth?	452
		Wisdom	456
		<i>Reading resources</i>	463
11 The arts	328		
Introduction	329	Index	468
What is art?	330		
Judging art	338		
Art and knowledge	344
